ABSTRACT

Data for this 24th annual report on opening fall enrollment in higher education were collected from two questionnaires. The preliminary questionnaire requested total enrollment, as well as first time enrollment by sex and by full- or part-time attendance. The supplementary questionnaire called for a variety of detailed breakdowns. Summary tables show national totals for survey items by institutional control, level of institution, and State for fall 1969, as well as trend data from 1963. Because many institutions were unable to provide final enrollment counts by the date requested and because some were obliged to make partial estimates, no data on individual institutions are included in this report. All totals and subtotals presented are subject to change when the results of the supplementary enrollment survey are published.

HIGHLIGHTS

Total enrollment in institutions of higher education--including students in programs creditable toward a bachelor's or higher degree or in organized occupational programs of less than 4 years--was almost 8 million in fall 1969. This total represents a 5.4-percent increase over the fall 1968 enrollment, a substantially smaller increase than the 8.7-percent gain from 1967 to 1968.

Enrollment in private institutions decreased for the second consecutive year--by 0.3 percent following a 0.5-percent decrease from 1967 to 1968. However, there was a net loss in the number of private institutions from 1968 to 1969 as well--from 1,476 to 1,472.

Enrollment in public institutions continued to increase, by 7.5 percent from 1968 to 1969. The proportion of total enrollment accounted for by public institutions was 73.7 percent in 1969--1.5 percentage points more than the preceding year.

Enrollment of first-time students was not quite 2 million, an increase of 4.0 percent from 1968. For public institutions the gain was 4.7 percent; for private, 1.5 percent.

Women made up 40.8 percent of the total enrollment, a slight increase over the 40.5 percent in 1968, but nonetheless a continuation of a trend of long duration that has seen women constitute a gradually increasing proportion of total enrollment in institutions of higher education.

The proportion of full-time students remained at 69.3 percent in fall 1969, the third consecutive year at that level.

FOREWORD

This report is the twenty-fourth in a series of annual reports by the Office of Education on opening fall enrollment in institutions of higher education.

Opening fall enrollment data were collected on two questionnaires this year. The first was aimed at making a limited amount of preliminary information available as early as possible. This basic questionnaire asked only for counts of total enrollment and first-time enrollment, by sex and by full-time or part-time attendance. Separate counts of post-baccalaureate students and of students in occupational programs, which were included in last year's opening fall enrollment form, were not requested on this year's early form. The supplementary questionnaire, submitted by institutions a month later, called for a variety of detailed breakdowns. It is hoped that this two-stage collection of data is not only expedient for the institutions supplying the information but also advantageous to users in having preliminary statistics earlier than the compilations of more detailed data can be prepared.

Summary tables show national totals for survey items, by institutional control, level of institutions, and State, in fall 1969, as well as trend data from 1963. Inasmuch as many institutions were unable to provide final enrollment counts by the date requested, and some found it necessary to make partial estimates, no data on individual institutions are included in this report. Also, all totals and subtotals presented in this report are subject to change when results of the supplementary enrollment survey are published.

The Office of Education extends its appreciation to the registrars whose efforts have made possible the publication of these data.

Theodore H. Drews

INTRODUCTION

This report is based on the questionnaire Opening Fall Enrollment, 1969 - Basic Information. Only minimal information was requested in this survey so that the results could be made available in published form as early as possible. More detailed information, collected on a second questionnaire, Opening Fall Enrollment - Supplementary Information, will be published separately. The counts presented in this report are treated as preliminary data--and should be so considered by readers--because many institutions were unable to provide final counts of enrollments by the due date--October 15. However, no institution was unable to provide at the very least an estimate of opening fall enrollment counts.

This report includes basic data on total enrollment in institutions of higher education, including students in programs chiefly creditable toward a bachelor's or higher degree or in organized occupational programs of more than 1 but less than 4 years not chiefly creditable toward a bachelor's or higher degree. The only subcategory is that for students who were in college for the first time. Subtotals by sex and by attendance status (full-time or part-time) are also provided. More extensive detail on various categories of students will appear in later publications. Except for the categories and subtotals indicated above, year-to-year comparisons of opening fall enrollment data cannot be made with this report. The detail in later reports, based on the supplementary questionnaire, will permit more extensive comparisons with fall enrollment data from prior years.

The Education Directory, 1968-69, Part 3, Higher Education (OE-50000-69) was the primary source for the list of institutions included in the survey on which this report is based--with such changes in the fall of 1969 as were known by the Office of Education.

Classification of Institutions

Institutions of higher education included in this report are classified either as 2-year or 4-year institutions, with universities broken out as a separate subgroup of the latter category. At any given time there might be a number of institutions converting from one category to another; such institutions are classified in their new category in the fall subsequent to official notification of the change in their status.

The 4-year institutions are those that offer programs extending at least 4 years beyond high school. They comprise all institutions that grant bachelor's or higher degrees or some recognition equivalent to such degrees; e.g., ecclesiastical recognition in a theological institution. They may also offer organized occupational programs of less than 4 years that result in an associate degree or some other recognition of completion such as a certificate or diploma.

The numbers of institutions in the fall 1969 survey were as follows:

	Control		
	<u>Total</u>	<u>Public</u>	<u>Private</u>
All institutions	2,536	1,065	1,471
4-year institutions	1,646	428	1,218
Universities	160	95	65
Other 4-year	1,486	333	1,153
2-year institutions	890	637	253

Questionnaire Editing

Each report in this survey was compared with the report filed in the fall of 1968 by the same institution. Large differences in enrollment figures were accepted if the reasons for the differences were readily apparent. In cases for which explanations were needed, previous correspondence and catalogs and various reports of the institution were utilized. When necessary, institutions were consulted by letter or telephone for verification of the figures reported or for revisions of the reports. These procedures undoubtedly eliminated many of the larger reporting errors, but the extent to which small unrecognized errors may remain in the data is unknown.

For the convenience of the reader as well as to facilitate statistical tabulation, totals have not been rounded but are presented as they were obtained by simple addition of the figures provided by individual institutions. Totals and subtotals, however, are not represented as being accurate to the last digit. On the other hand, considering the care and effort with which the data were compiled by the registrars and reviewed by the Office of Education, it seemed appropriate that the totals reflect the individual reports.

First-Time Students

Of the total number of college and university students enrolled in the fall of 1969, not quite 2 million were first-time students. This is an increase of 4.0 percent over the enrollment of first-time students reported for fall 1968. Not only was the gain in first-time students in 1969 less than the gain in total enrollments (5.4 percent) but it also contrasts sharply with the increase in enrollment of first-time students in the fall of 1968--15.5 percent. On the other hand, the gain in enrollment of first-time students in 1967 was only 5.5 percent.

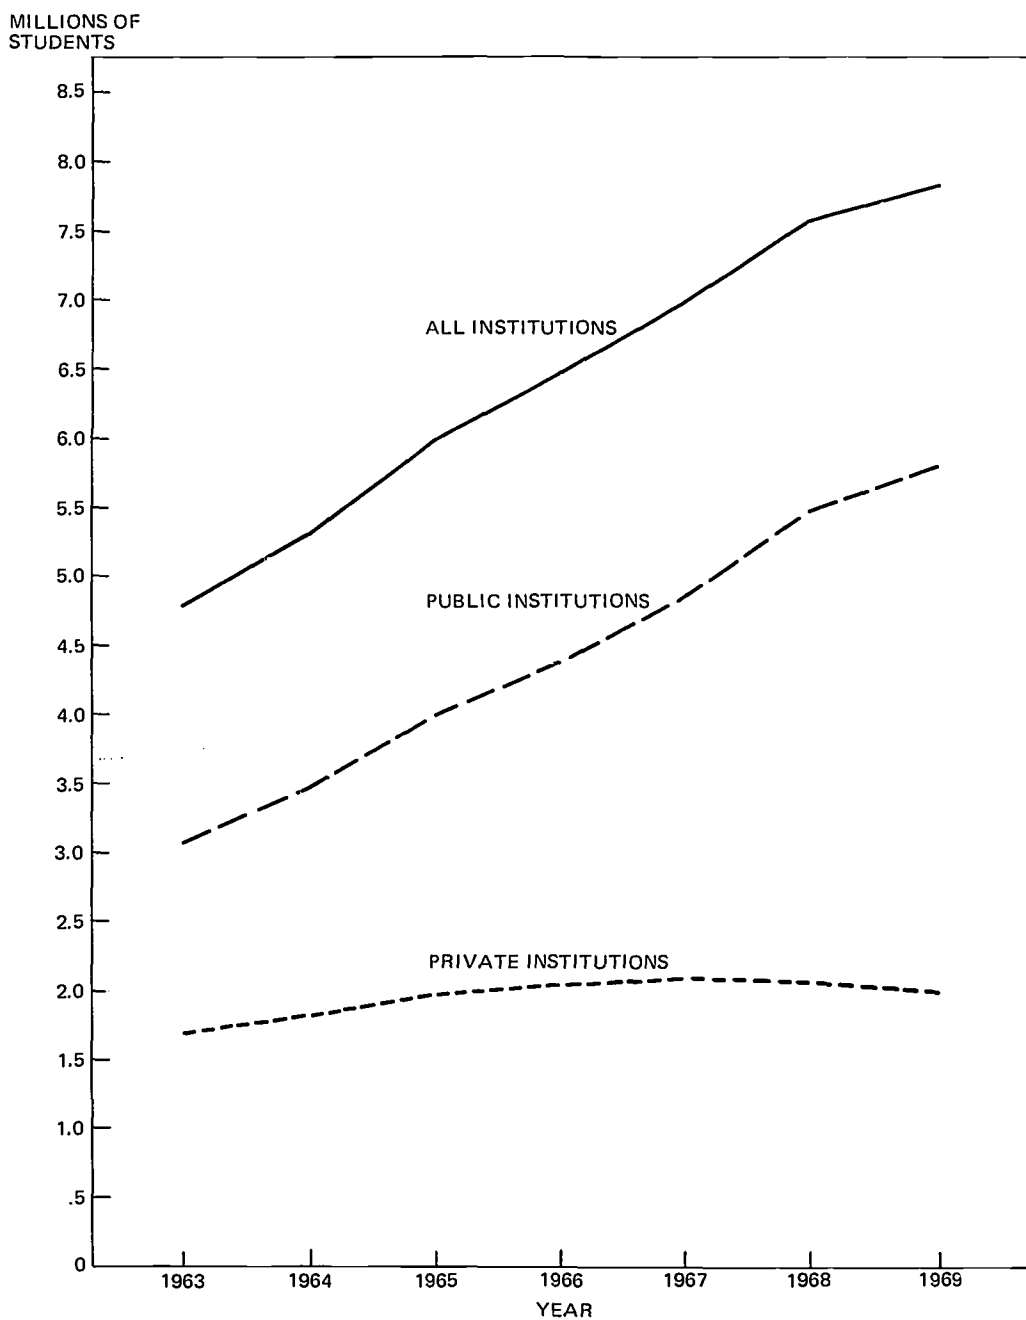

Inasmuch as the increase in enrollment of first-time students in the fall of 1968 appears to be far out of line with the increases in the years immediately preceding and following, some insight into the probable causal factors may be helpful. First, it is quite likely that there was at least a modest jump in the enrollment of first-time students in the fall of 1968. Second, there was a net increase of 100 in the number of 2-year institutions in the survey universe, in addition to a number of new 4-year institutions, from 1967 to 1968. Not all students enrolled in these new schools were necessarily freshmen, but it is highly probable that large numbers were first-time college students. Also, in addition to a great variety of other factors, some inadvertent overreporting may have occurred, such as the inclusion of new transfer students, or perhaps the reporting of the entire freshman class.

General Note

Comparison of 1969 enrollment totals with those reported for 1968 in the State of Rhode Island seems to show that enrollment for that State decreased between 1968 and 1969. However, the 1968 enrollment for the University of Rhode Island was overstated because the 5,022 students reported for the university's Division of University Extension were also included with the main campus figures. A more accurate comparison of year-to-year enrollment figures can be made by subtracting the duplicated extension enrollment figures from the University of Rhode Island totals in all 1968 tables that include publicly controlled universities. State, national, and all other subtotals must be adjusted accordingly. The net result is an actual increase, rather than a decrease, in enrollment for the State of Rhode Island from 1968 to 1969.

Because of additional processing, some data in this report differ from information published earlier.

Fall 1966 to 1967	+5.5	+4.6	+6.7	+9.2	-3.3

1/ Aggregate United States includes the 50 States, the District of Columbia, U.S. Service Schools, and outlying areas.

2/ Includes students whose programs of work consist wholly or chiefly of work normally creditable toward a bachelor's or higher degree plus students in programs requiring 1, 2, or 3 years of college work which are designed to prepare for immediate employment rather than as the first 1, 2, or 3 years of a bachelor's degree program.

3/ All figures for 1969 should be considered preliminary, although no significant changes in numbers or percentages are anticipated when final counts become available.

4/ A first-time student is defined as a new freshman who has never previously been enrolled in an institution of higher education. First-time students are included in the appropriate "Total, all students" counts. Data for first-time students for years prior to 1966 are not comparable since they include only first-time students in programs chiefly creditable toward a bachelor's degree.

SURVEY REPORT FORM

GENERAL INSTRUCTIONS

Please fill out a separate form for the main campus and for each branch or other campus. Do not fill out separate forms for extension CENTERS. Extension students should be reported on the form for the main campus. Please mail this form to the U.S. Office of Education as soon as enrollment becomes stabilized, but by October 15, 1969, if possible.

Please read instructions below before completing this form. If you need additional clarification on any item, please call Dr. Marjorie Chandler, Area Code 202, 962-7301 in Washington, D. C.

If exact counts are lacking for a group that should be reported, please include an estimate for that group.

Make sure entries in Columns 1 through 4 add to totals in Column 5.

Do not include in this report:

- (a) Students in noncredit adult education courses.
- (b) Students taking courses at home by mail, radio, or television.
- (c) Students enrolled only for "short course's".
- (d) Auditors.
- (e) Students studying abroad.
- (f) Students in any branch campus or extension center in a foreign country.

SPECIFIC INSTRUCTIONS

LINE 1. Include resident and extension students taking work normally creditable toward a bachelor's or higher degree AND students in organized programs of less than four years NOT chiefly creditable toward a bachelor's degree. Include "special" or "unclassified" students taking such work regardless of intention concerning a degree, diploma, or certificate. Students to be included may be enrolled on campus or at extension centers, studying during the day or evening, enrolled at the undergraduate or postbaccalaureate level. Living quarters (on campus or off) and legal domicile are irrelevant.

LINE 2. Include those students already reported on Line 1 who are enrolled in your institution for the first time this fall and have never been enrolled in any other institution of higher

education. Include as first-time students those admitted this Fall under "advanced credit" or "advanced placement" plans who received some credits through examinations, test scores, etc., if they have never previously been enrolled in an institution of higher education. Exclude from the first-time group students who enrolled in Summer 1969 and all students entering your institution as transfers.

COLUMNS (1) and (3). Count as full-time students those carrying at least 75% of a normal student-hour load. For graduate students, this means at least 75% of the academic load in course work or other REQUIRED activity (such as theses, research, or teaching).

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE OFFICE OF EDUCATION WASHINGTON, D.C. 20202 HIGHER EDUCATION GENERAL INFORMATION SURVEY OPENING FALL ENROLLMENT (Higher Education), 1969 BASIC INFORMATION		DETACH THIS PORTION AND MAIL IT TO U.S. OFFICE OF EDUCATION.
